**Coatings:** Galvalume Plus<sup>®</sup>, Standard Color, Kynar

The Reverse PBR panel is a semi-concealed fastener wall panel that can be used in both interior and exterior applications. It can be used as a finished exterior wall panel to accommodate 6-inch-thick blanket insulation.

#### FEATURES AND BENEFITS

- Commonly used as a backer or metal sheathing for exteriors that are finished in EIFS or brick.
- Accommodates higher 'R' value, energy-efficient insulation systems.
